VERSION

v8 — Final

HOOK — 0:00

If you're already making content —
recording, showing up, putting in the hours —
but your reach is still nowhere near where it should be for the quality you're putting out...

this is the most important video you'll watch this year.

I'm not going to tell you to post more, record better, or fix your hooks.
You're already doing the work. The problem is something else entirely.

YOUR INTRO — 0:28

My name is **Ashish Kumawat** — I'm the founder of **Ripple Media**.

I've spent the last **[X] years** in content marketing. I run **@smmguy** on Instagram where I've built **[8,000+] followers** teaching distribution and content strategy to founders.

More importantly — here's what we've done for the people we work with:

[Client name] went from **[X views]** per video to **[X million views]** — same content, nothing new recorded.

[Client name] grew by **[X,000] followers** across platforms in under **[X] days**.

Across everything we manage, we've driven over **[X] million views** for founders, podcasters, and creators in the last **[X] months**.

I'm not here to sell you a course or give you a checklist.

I built a system — and I'm going to show you exactly how it works.

THE ISHOWSPEED MOMENT — 1:28

Do you know who IShowSpeed is?

Of course you do.

Have you ever watched one of his 4-hour streams?

Probably not.

Most people who know IShowSpeed have never watched a full stream in their life. Same with KSI. Same with MrBeast — 300 million subscribers, but the number of people who recognise his face is five, ten times that.

People who've never subscribed. Never visited his channel. Never watched a single video.

They still know exactly who he is.

That's not talent. That's not the algorithm.

That's distribution.

Every wild moment — clipped. Every best line — trimmed to 30 seconds and spread across every platform, in front of people who would never have found the original.

The stream was the content. The clips were the distribution.

And the distribution is why they're famous.

Here's where you are:

You're doing the stream. You're creating real, valuable content. But you have no distribution layer.

Your video goes up, reaches the same small audience, and dies in 48 hours.

The people who need to hear what you have to say — who would follow you, buy from you, tell everyone about you — will never stumble onto your account.

Not because your content isn't good enough.

Because nobody is spreading it.

THE GAP — 3:23

You open Instagram. You open LinkedIn.

And you see someone in your niche — weaker content, less experience, less to say — but they're *everywhere*. Millions of views. Inbound DMs. Brands reaching out.

What do they have that you don't?

Distribution. That's it. That's the whole gap.

Right now you're waiting to be discovered.

Distribution means you stop waiting and start spreading.

WHY EDITORS DON'T WORK — 4:03

Some of you have tried this.

You went on Whop. You ran a bounty campaign. You put in \$10,000, launched it, and waited.

And what did you actually get?

Random editors picking up your content. Some post it. Some don't. Some post it once and disappear. You have zero visibility into what's happening, zero control over what goes out, and zero say in how your brand is represented.

And here's the part nobody talks about —

The editor controls your content more than you do.

They own the page. They own the account. They own the audience sitting on that page.

The moment an editor gets bored, pivots their niche, or just decides to delete their account — your content is gone. Your audience is gone. Everything you paid for, everything you built on that page — gone overnight.

You invested \$10,000 hoping for views. What you actually bought was someone else's control over your brand.

Ripple is the opposite.

A distribution layer that costs **90 times less** than running a clipping operation — and gives you **10x to 50x more reach, more control, and more authority** than any bounty campaign ever will.

Because with Ripple, every account, every video, every view — goes back to you.

THE RIPPLE SYSTEM — 5:13

We take your existing content — the videos you're already making — and run them through a multi-platform distribution system.

Same content. Multiple accounts. Instagram, TikTok, YouTube Shorts — simultaneously.

Exactly like IShowSpeed. He streams for 4 hours. By the end of the week, the best moments have been seen by 50 million people who never watched the stream.

That's the model we run for you.

And every account we build belongs to you. Your brand. Your pages. Your audience. Your asset — permanently.

A video that gets 400 views when you post it alone can reach 400,000 people when it's properly distributed.

Not because the content changed. Because the right people are finally seeing it.

GUARANTEE — 6:18

Here's our promise.

If you work with us and you don't get **at least 20x the reach you're getting right now — within 90 days — we give you every rupee back.**

Every single penny. No questions.

Which means if it doesn't work, you essentially built your entire distribution infrastructure for free.

We push out a minimum of **5,000 videos of you per month** — across platforms, across accounts, consistently, every single day.

5,000 pieces of your content, your face, your message — in motion. Every month.

That's the machine. And it either delivers 20x your reach in 90 days, or you pay nothing.

FUTURE PACING — 7:00

I want you to picture something.

You wake up tomorrow morning.

You pick up your phone — and you see it: 5,000 videos of you. Your content. Your face. Your ideas. Spreading across Instagram, TikTok, YouTube Shorts — right now, while you were sleeping.

You open Instagram and someone from your city has shared your video.

You open TikTok and a founder in your niche is watching a clip of something you said three weeks ago — for the first time.

You open LinkedIn and someone tags you saying — *"this is the guy you need to watch."*

People in your space are opening their phones — and it's you.

On their feed — you. On their explore page — you. In their DMs, being shared by someone they trust — you.

You didn't post more. You didn't go viral. You didn't get lucky with the algorithm.

You just finally control what people see.

Think about that. **You control your distribution.** Not an editor. Not a platform. Not a bounty campaign. You decide what message goes out, how it's framed, and who sees it — and then 5,000 versions of that message go out every single month without you touching anything.

Your competitors are posting once a day hoping the algorithm picks them up.

You are everywhere.

Every founder in your niche, every potential client, every person who needs to hear what you have to say — they're not going to stumble across you anymore.

They're going to feel like you're already the biggest name in the room.

Because everywhere they look — it's you.

That's not luck. That's not virality. That's a distribution system running for you 24 hours a day.

And it starts the moment you book a call.

📌 *Delivery note: Slow all the way down here. Let each image land before you move to the next. The more specific and visual you make it, the more the viewer sees themselves in it. That's what books the call.*

Click the button below.

Fill out the short form — tell me what you create, who it's for, drop 2–3 names in your niche.

Pick a time for your call.

Before we speak, you'll get a **Distribution Audit** in your inbox — where your competitors are getting their reach, and what your content could realistically do with proper distribution.

[X] spots open. When they're gone, they're gone.

You're already doing the hard part.

Let Ripple handle the rest.

Before You Shoot — Fill These In

Replace every highlighted placeholder with your real numbers.

☐

[X] years in content marketing

Your actual years of experience

☐

[Client name] → [X million views]

Your single best case study — name + result

☐

[Client name] → [X,000] followers

Second best result — follower growth

☐

[X] million views total

Combined views generated across all clients

☐

[X] months

How long Ripple has been running

☐

[X] spots open

How many client spots you're opening — keep it real and limited
